IMPAIRED WATERS, TMDLS, AND BASIN MANAGEMENT ACTION PLANS: ARCGIS ONLINE MAP QUICK START GUIDE

BROWSER GUIDE

Instructions are based on Internet Explorer version 9.0. Results may vary depending on your individual browser.

The contents tab will show all of the layers available in the web map. The layers can be checked on and off. Click on very top layer in the contents window to access the rest of the layers.

The basemap button will let you select and apply the basemap of your choice.

Use the search to type in a city or address to find a specific location on the map.

By clicking on any polygon, a pop-up box will appear with the information about that feature. One location may have multiple, overlapping boundaries. Click the arrow button to see the additional projects for each location.

The About button will provide a map summary and a link to view the information page of the map. Click More Details to see the Map information page.

A scale dependency is set for the labels on the BMAP areas. Zoom into the various BMAP boundaries to see the labels turn on.

This tool bar allows users to zoom in and zoom out. By pressing the home icon, the map is returned to its full extent.
